

# How to Play

Practice your 1-3 addition facts with this fun dinosaur themed game.

To play you will need:

- A die or spinner (preferably one with only numbers 1-3)
- Game pieces- anything small

Place your pieces at start.

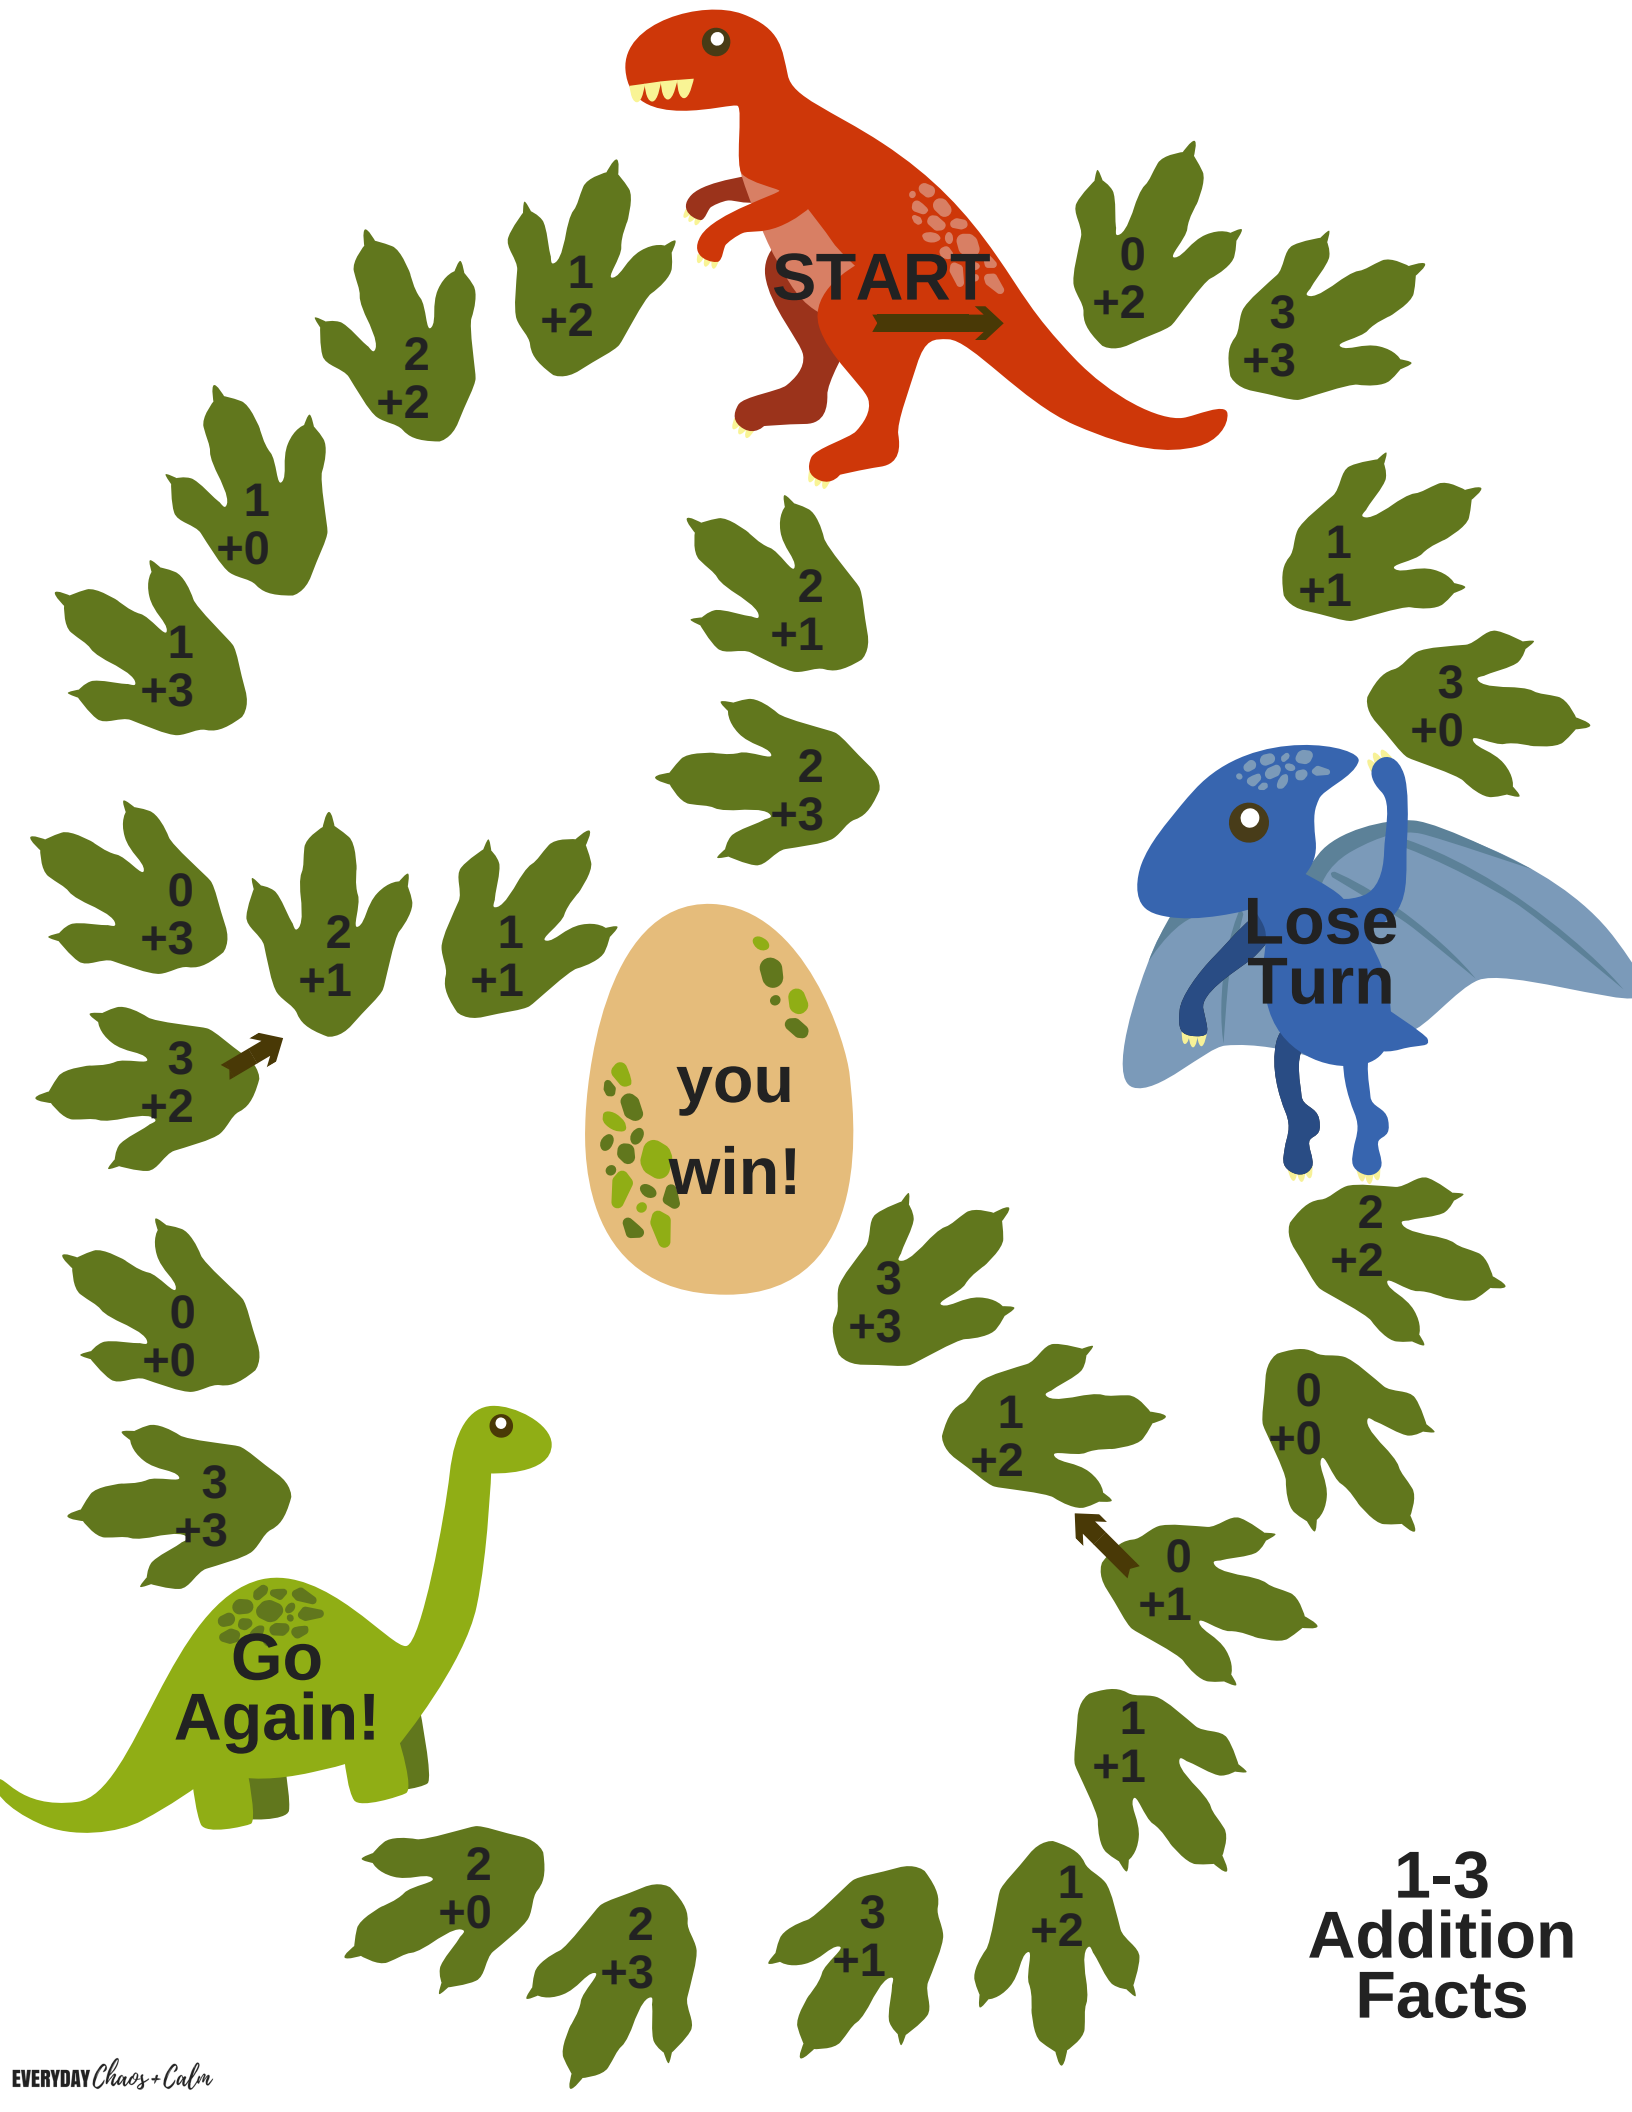

Roll the die and move the number of spaces.

Answer the fact on the space. If you get it right- great! If you get it wrong move back a space and try again.

If you land on a space with an arrow you get to turn and move toward the YOU WIN space.

To win you have to land on the YOU WIN space. If your roll takes you past the space- head back toward start and go around again!

Play daily until the facts come quickly and correctly. Then move to the next level.
